Release 30 Sep 2015

### e-Learning Course for Improving Production Managing Skills IS ONLINE & FREE!

On 11<sup>th</sup> and 12<sup>th</sup> of September 2015, the final MeVeL partnership meeting took place in Ankara, Turkey. The meeting has been followed by final conference on 12<sup>th</sup> September afternoon. Final conference has been organised by POINT LLC based in Turkey (www.pnt-grp.com) in cooperation and strong support of Turkish National Chamber of Mechanical Engineers (www.mmo.org.tr).

Conference aimed to present MeVeL idea, the project, MeVeL portal and finally the portal's extension; e-learning medium. Opening ceremony was followed by "Introduction of MeVeL Project and Virtual Mobility" presentation by Mrs. Marta Palacio Aresti (FFE - Spain). Rest of the partners have briefly explained "Current and future benefits to Production Engineers - Organisational/Country based applications" and finally Ms. Danute Pranckute (VDU - Lithuania) gave a brief on "Practical Applications of Virtual Mobility". Closing presentation was on "New Economy and Business World" by Prof.Dr. Alev Soylemez from Gazi University of Ankara.

Following this closing conference event, MeVeL project will be alive and serving to Metal Sector professionals "Production Managers and Engineers bearing controlling responsibilities" via its portal [www.mevel-eu.net](http://www.mevel-eu.net) which also directs users to its e-learning platform based on Moodle and contained at VDU servers. MeVeL e-Course is offering the below online elements, which are aimed to be improved and/or enhanced during upcoming phases of the project phases.

#### SMART TOOLS FOR PRODUCTION MANAGERS e-Learning Content (52 hours in total)

##### Module 1

Professional Technical English

##### Module 2

Quality and Production Management: Cost Reduction

##### Module 3

Modular Product Architecture (Optional - Visual Planning)

##### Module 4

ICT, WEB 2.0 & SW for Metal Sector

##### Module 5

Practical Example

*"A Leonardo Da Vinci Project"*  
MeVeL - Fostering the Virtual Mobility within the Metal Sector  
2013-1-ES1-LEO05-67974

*This project has been funded with support from the European Commission. This newsletter reflects the views only of the project consortium, and the Commission cannot be held responsible for any use which may be made of the information contained therein.*

Users are able to give a feedback via Moodle platform, join to discussions as well as virtually meet with their colleagues. Forums are also available for sharing specific experiences relating to Modules offered.

If users happen to seek any sort of support about the project and/or products, they are very welcome to contact to their National contact points, who are addressed at the project portal.

### What is "Virtual Mobility" in this project concept:

*"Virtual mobility definition within MeVeL project: learning activity in the distance (not physical) in order to share experiences, information and knowledge between professionals within an international context; taking into account that:*

- this exchange can be done among workers located in different contexts and places or between a training center (VET center) and workers;
- it includes also a learning activity, not only limited to the exchange of professional experiences (telework)

*In technical sense "Virtual mobility" is a set of activities supported by information and communications technology, including e-learning, organised at institutional level, that realise or facilitate the international, collaborative experiences in a context of teaching and/or learning as per definition stated in Regulation of the European Parliament and of the Council establishing "ERASMUS+": The Union Programme for Education, Training, Youth and Sport and repealing Decisions No 1719/2006/EC, No 1720/2006/EC and No 1298/2008/EC*

*"A Leonardo Da Vinci Project"*
